

NetSHIELD™ APPLIANCES

NANO
25 & 100

Branch PRO

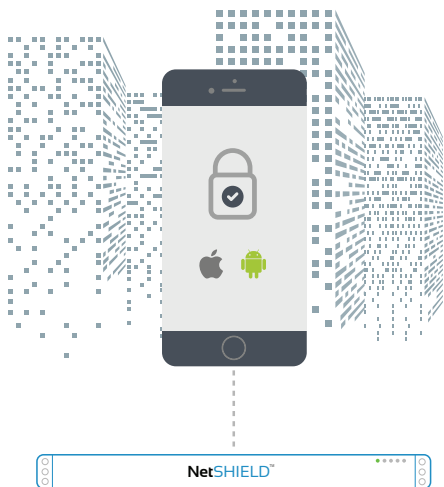

Enterprise 10/100/250/1000

Prevent Unwanted Access, Quarantine Zero-Hour Malware Attacks & Phishing Attacks

Secure your network from the inside out

NetSHIELD delivers a rich feature set of agentless network access control (NAC) and critical intranet security that firewalls and AV solutions do not address & where 95% of today's breaches occur. Additionally, zero-hour malware and phishing attack real-time quarantine, mac-spoof detection, TLD blocking, comprehensive auditing, vulnerability assessments, and compliance reporting & enforcement make this a comprehensive and compelling offering. The NetSHIELD solution is available as a hardware appliance that scale from 25 to 10,000 protected assets per appliance. In addition, an embedded command center allows administrators to manage up to 1000 remote sites.

MobileSHIELD™ ENDPOINT AGENT

Control and secure mobile devices connected to corporate networks.

Let us help you enable safer BYOD on Android & iOS

SnoopWall's patented MobileSHIELD agent is deployed and administered via the NetSHIELD Command Center. MobileSHIELD ensures BYOD flexibility by enabling owner control over device settings, applications and application privileges while not connected to corporate network resources. Administrator control over device settings, applications, application privileges, ports and mobile data connectivity is defined and enforced while mobile devices and tablets are connected to corporate networks.

WinSHIELD™

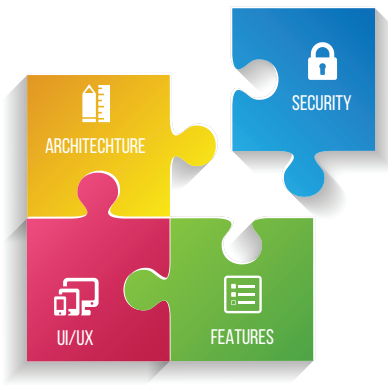

Control and secure Windows devices connected to corporate networks.

Remote Workers and BYOD for Windows: Proactively Secure

WinSHIELD is designed to secure Windows® laptops, desktops and servers by enabling administrative control over device settings, applications and application privileges while connected to corporate network resources. Administrator control over device settings, applications, application privileges, ports and data connectivity is defined and enforced while desktops, laptops/netbooks, tablets and servers are connected to corporate networks. WinSHIELD may be deployed on any Windows device or tablet to enhance corporate IT security oversight and control.

AppSHIELD™ SDK

You have built a great app with an amazing team.

Let us help you secure it

SnoopWall's patents-pending AppShield™ SDK can secure any mobile app on all major platforms. AppShield SDK acts as an application & port authority which makes your app invisible to any other app on the mobile device. With 24/7/365 active monitoring, regular updates and a dedicated team of cybersecurity experts, you can be assured that your app's security and customer data are safe, providing a non-intrusive customer experience.

About SnoopWall
